**The Book of Faces: Secrets of Portraiture**

Among the museum collections, portraiture is a field that is worthy of further study. Thus, the museum has conducted a study on its selected portrait collections and organized this exhibition. The exhibition of portraits is like an open book of faces, giving rich and interesting clues to how artists view their models and the world in their unique perspectives. Through this "book of faces," we attempt to establish a network like the Facebook, in which visitors connect not only with the figures portrayed in the paintings but also with each other in the real world.
